

NIKOLE SCARLET GARCIA CHAVEZ

Data Analyst | BI Developer | Junior Data Engineer

 Nikole370 |  LinkedIn |  niscgarcha@gmail.com |  Lima, Peru

Professional Summary

Data and BI professional with nearly two years of hands-on experience across SQL, Python, APIs, ETL, reporting, and systems support. I build and maintain data flows, SQL assets, backend services, dashboards, and cloud deployments using Docker and AWS. My work combines business-facing analytics with technical troubleshooting and is complemented by public projects in Tableau, reproducible data analysis, and geospatial machine learning. I am focused on Data Analytics, BI, and junior Data Engineering roles, with a track record of documenting decisions and delivering end-to-end technical solutions.

Professional Experience

Junior Software Developer

Feb 2025 – Present

Qualis Tech

- Develop and support backend services, REST APIs, SQL assets, reporting solutions, and data flows for confidential client systems.
- Build Python ETL processes that move data from API endpoints into databases and Power BI, and maintain AWS QuickSight dashboards and their SQL dependencies.
- Create and modify views, scheduled jobs, and queries; optimized a 2,060-row reporting query from approximately 6 min 54 sec to about 1 sec while preserving the expected row count.
- Support deployments and troubleshooting with Docker, Docker Compose, and AWS; contribute to CI/CD implementation with growing autonomy using Jenkins, ECR, ArgoCD, MicroK8s, Kustomize, Vault, and SonarQube.
- Document architecture, procedures, incidents, technical decisions, and operational validations.

IT Analyst

Jul 2024 – Jan 2025

Valticore Company S.A.C.

- Developed and optimized SQL queries for reporting and data validation.
- Tested backend APIs with Postman and analyzed change requests to identify regression risks.
- Supported debugging, troubleshooting, and incident triage in collaboration with development teams.

Selected Projects

NYC 311 Service Requests Analytics

2026

Python, pandas, Jupyter, scikit-learn, Tableau

- Built a reproducible analysis of approximately 20.8 million NYC 311 service requests from 2020 to 2026, covering profiling, cleaning, source modeling, analytics, and visualization.
- Prepared a star schema and Tableau-ready metrics; applied PCA to aggregated agency profiles and documented methodological decisions and technical QA.
- [Code and documentation](#) | [Visual story](#)

Retail Sales Performance Dashboard

2026

Tableau, dimensional modeling, calculated fields, data storytelling

- Designed an executive dashboard to evaluate 2025 sales, target attainment, margin, and regional performance with year-over-year context.
- Analyzed 11,520 records: S/ 163.0M in sales, 22.1% growth over 2024, and 89.4% target attainment; findings are presented as descriptive analysis without causal claims.
- [Code and case study](#)

EcoLima – Thesis in Progress

2026

Python, LightGBM, SHAP, FastAPI, Vue 3, PostgreSQL/PostGIS, Azure

- Co-authored a thesis project that uses GIS and machine learning to recommend recycling-point locations in Metropolitan Lima.
- Lead contributor to the ML component, including the LightGBM pipeline and SHAP-based explainability; also provided support for backend, frontend, and deployment work.
- Work in progress with limited real-data coverage and simulated data used for pipeline development; spatial validation and validation of the real target remain pending.

Technical Skills

Data and BI	SQL, Python, ETL, data modeling, Power BI, Tableau, AWS QuickSight, pandas, Jupyter
Backend and APIs	Python, REST APIs, FastAPI, Flask, Postman, service debugging and testing
ML and analytics	scikit-learn, LightGBM, SHAP, NLP, PCA, model evaluation
Cloud and delivery	AWS (EC2, RDS, ECR, ALB, Route 53), Azure, Docker, Docker Compose, CI/CD, Kubernetes/MicroK8s, Jenkins, ArgoCD
Engineering practices	Git/GitHub, Linux/Windows, troubleshooting, technical documentation, incident analysis
Languages	Spanish (native); English (intermediate/conversational)

Education

Universidad Peruana de Ciencias Aplicadas (UPC) 2018 – Present
Bachelor's degree in Computer Science, expected graduation in 2027. Coursework focused on software development, databases, machine learning, and data analytics. Member of the UPC ACM Student Chapter.
